

**Fast, Accurate, Painless**

### Migrate from DM 5 to WorkSite

**Shamrock** is our industry-leading, high-speed migration engine for files, metadata and folders. Shamrock moves content from legacy document management systems to Interwoven WorkSite. Shamrock preserves the documents, the profiles and the folder structures from DM 5 and other document management systems.

Shamrock is a readily deployable Web-based SQL Server tool that can be configured to meet the specific migration objectives of an organization.

Shamrock accommodates any deployment strategy – by user, group or office. Shamrock can migrate the entire enterprise in a single weekend, if desired. Shamrock is designed to minimize end user downtime associated with system conversions.

### Database Reorganization

Database consolidation and document archiving occur during the document migration. Shamrock transforms geographically distributed profile groups into centralized, date-oriented libraries at the same time that the profiles and documents move from the legacy system to WorkSite.

### “Day One” Productivity

Baker Robbins knows that a key factor in the success of a migration project is how quickly users can get back to work. The Shamrock migration platform simplifies the transition to the new system by:

- Migrating profiles, documents, and folder structures for seamless user transitions
- Generating document worklists based on recent edit list or file system activity
- Building the DMS full text index in advance for Day One availability.

### Metadata Transformations

Shamrock dynamically updates metadata during the migration. Customized metadata transformations can be developed to support business objectives, such as:

- Simplifying an outdated and ineffective document type list.
- Aligning metadata when two firms merge
- Re-organize metadata to support Matter Centric design objectives

### Proven Methodology

Shamrock is a proven and effective tool for populating an Interwoven WorkSite library. The tool has imported tens of millions of documents and implements our best practices for large scale document migrations.

### Learn More

We are a strategic Interwoven product partner, active with product direction for the last twelve years. Our Team has deployed more seats of WorkSite than any other reseller or consulting partner. After the migration, our prestigious list of clients continues to rely on us for thought leadership and the innovative application of well-designed technology.
